Rediawan Ibrahim

Software Engineer | Full-Stack Developer

Jakarta, Indonesia | +62 896-9321-8083 | rediawanibrahim15@gmail.com

---

Education

Institut Bisnis Nusantara | Bachelor of Computer Systems | September 2017 – February 2022

Professional Experience

Universitas Indonesia Maju | Full-Stack Developer | May 2023 – August 2025

- Designed and implemented responsive frontend applications using Angular, TypeScript, HTML, and SCSS.
- Built and maintained backend services and REST APIs for data processing, system integration, and business operations.

PT Reycom Document Solusi | IT Programmer | November 2022 – May 2023

- Developed desktop applications using C# and Microsoft SQL Server, automating data processing workflows and document generation.
- Built an Excel-to-PDF automation system capable of processing large datasets. Improved operational efficiency by reducing manual document processing.

Projects

Agentic Repository Debugger | Micro1 Frontier Engineering Challenge 2026 | August 2026

- Designed a reproducible **12-case benchmark** for autonomous code repair in a production-style Go commerce API, covering concurrency, transactions, validation, pricing, persistence, and HTTP error handling.
- Built **12 case-specific evaluators** and an injection-to-repair provenance workflow, validating agent-generated fixes through regression, repeated, and shuffled test execution.
- Documented and demonstrated **baseline vs. improved agent workflows**, including reproduction instructions, improvement changelog, agent trajectories, and evidence for all 12 cases.

Bred AI Workspace | Personal Project

- Building a full-stack AI-powered workspace for productivity and internal engineering workflows using React, TypeScript, Go, Fiber, and PostgreSQL.
- Developing modular frontend and backend architecture with REST APIs, authentication, state management, form validation, and database persistence.
- Applying clean architecture, reusable components, automated testing, and maintainable engineering practices across the application.

Technical Skills

- **Frontend** : React, TypeScript, Vue.js, Angular, HTML, CSS, Bootstrap
- **Backend** : Go, Fiber, Node.js, Express.js, C#, .NET
- **Database** : PostgreSQL, MySQL, Microsoft SQL Server
- **Tools** : Docker, Git, Cloudflare, Postman
